This proposal is to install sections D & E with plants that have been successful in these areas and other throughout the site.

Project Narrative:

Upon mobilization, ASI will begin with removal of unwanted existing plants. During this process we will analyze the grade in all areas in Sections D & E and correct as needed. During this phase we will also remove existing drip irrigation and preserve what we can and remove what is not reusable. The wetland area in Section D will have all under-story and sucker growth, and trim all trees to provide a more visual appeal. During the plant installation phase, team members will lay out the plants and layout will be reviewed by management to insure that the layout and spacing are proper. Upon installation of plant material, all excess dirt from the plant installation will be graded smooth. The existing and new drip line will be installed per industry standards to insure of adequate watering and adjust the controller so these areas receive daily watering, Including the new turf. From there all areas will be mulched to desired thickness and a walk-through will be scheduled for review with the appropriate board members to create/form a punch list to be processed and handled with 72 hours.
